Wood preparation

The background image is a close-up, slightly out-of-focus shot of a chainsaw cutting through a log. The chainsaw's body is dark, and a bright orange light is visible near the blade, likely from a safety or visibility feature. The log is light-colored, and the surrounding environment is filled with green foliage, creating a bokeh effect.

X-Series axes

Fiskars next generation splitting axes are a true evolution of craftsmanship –purpose-designed for one strike splits of even the thickest logs. The special blade geometry and finish is complemented by a light sturdy shaft and perfect balance. Pick your size according to the task at hand.

KEY BENEFITS

- ✓ 35 degree convex cutting bevel angle for splitting axes - the convex shape strengthens the edge to make it less sensitive to fracture
- ✓ Perfect balance between head and shaft for the most safe, comfortable and efficient swing
- ✓ Ultralight and durable FiberComp™ shaft minimizes fatigue and makes the axe virtually unbreakable
- ✓ Optimal anti-shock surface structure ensures a comfortable, firm grip
- ✓ Hooked end of the handle prevents the axe from slipping out of the hand
- ✓ Comes with a plastic sheath for easy carrying and storage

Chopping vs. splitting

Chopping axes

Fiskars next generation chopping axes serve all manner of woodwork, chopping, carpentry and pruning. The range delivers a wonderful package of minimalist design and sharp-edged functionality with the right fit for all wood preparation tasks. Pick your size according to the task at hand.

The Universal Chopping Axe's thin, wide edge ensures a clean, easy cut in fresh, resinous wood, like spruce or pine.

Splitting axes

Fiskars next generation splitting axes are a true evolution of craftsmanship –purpose-designed for one strike splits of even the thickest logs. The special blade geometry and finish is complemented by a light sturdy shaft and perfect balance. Pick your size according to the task at hand.

The Splitting Axe features a unique cutting edge that easily slices into the wood, which the thick axe blade then pushes apart.

Choose the right size for you

1. LENGTH TEST

Grab the axe on the shaft below the blade. Turn the shaft towards your armpit and if the end of the shaft reaches the armpit the axe is too long

2. WEIGHT TEST

Grab the axe at the end of the shaft and let the head rest towards the ground. Lift the head up with a wrist turn close to your body as pivotal point (axe is vertically in your hand at the end of the movement) If you can't lift the axe this way, the axe is too heavy.

Fiskars StaySharp™

The Fiskars StaySharp™ Max reel mower promotes greener, healthier lawns by cutting each blade of grass cleanly with a scissor-like action. This minimizes the lawn's moisture loss and reduces exposure to disease.

The Reel Mower lets you cut grass without noise, uncomfortable vibrations and the hazards associated with power driven rotary blades. It is one of the most environmentally friendly ways to cut your lawn.

- Long-lasting performance due to StaySharp™ cutting system using precision-ground, hardened steel blades to cut grass without touching
- Ergonomic, height-adjustable handle with padded grip for more comfort
- Forward grass discharge

The orange classics

2017 is the 50th anniversary year for the orange handled Fiskars Classic scissors, design icons that have been popular for a half a century. The range consists of a wide selection of scissors featuring blades made of high quality stainless steel.

Scissors

Fiskars orange handled scissors are design classics that have been popular for more than four decades. Our selection of garden scissors are excellent for precise cutting and trimming tasks. The carbon steel blades easily cut through materials from fine wire to flower stems.

Pick the right pruner

New

PowerGearX™

- Patented PowerGear™ mechanism makes cutting 3,5 times easier compared to standard mechanisms
- Blades made from extra hard, corrosion resistant steel (CrMoV) ensures that they stay sharper longer
- Unique rotating handle movement ensures that all fingers are used simultaneously and exert an equal but reduced pressure for maximum power and less effort on every cut

PowerStep™

- Allows to cut thin and thick branches with the same tool, without compromising on the performance
- Thin branches are cut in one easy snip – thicker branches in 2 or 3 gradual steps to reduce the force needed per stroke
- Mechanism automatically sets the applicable amount of strokes

SmartFit™

- Optimal reach thanks to adjustable length of the handles
- Lightweight product, comfortable to use
- Ergonomic design
- Optimally shaped to fit the hand
- Fits your need - multi-purpose usage with adjustability of cutting capacity
- Fits small to large hands

PowerLever™

- Lightweight FiberComp™ handles designed for small and medium-sized hands
- Reduced cutting effort and ability to use all fingers simultaneously thanks to patented PowerLever™ mechanism
- Easier cutting and cleaning due to non-stick PTFE PowerLever Pruners coating on the upper blade to reduce friction

Fingerloop

- Lightweight and strong FiberComp™ handles with SoftGrip™ for added comfort and safety
- Fingers are protected by the loop in the lower handle
- Corrosion resistant, stainless steel blades

SingleStep™

- Lightweight and durable handles made from polypropylene
- Comfortable grip due to sturdy handles
- Steady cutting action due to well-balanced design

PowerGear X™ pruners

Fiskars PowerGear X™ is a versatile family of tools that include pruners, loppers and hedge shears to cover most of the cutting needs in the garden. Anvil or bypass?

BYPASS

Both blade and counter blade press into the wood to make a clean cut with less compression damage (cutting blade bypasses counter blade in a scissors-like action). Possible to cut close to the stem. Best suitable for fresh wood.

ANVIL

Upper blade is forced through the wood with greater pressure as the anvil blade supports the branch and spreads the pressure until the cut is complete. Best suitable for dry or dead wood.

PowerStep™, Pro & SmartFit™ pruners

There are a multitude of different plants and tasks in the modern gardens and consequently also gardeners with day-to-day varying needs. The PowerStep™ pruner adjusts to optimal power assistance level for cutting of both thin and thick branches, and the SmartFit™ pruner optimizes the combination of cutting speed and branch thickness. Pro Pruner has been designed according to the traditional form and with special features appreciated by professional gardeners.

A close-up photograph of a person's hand gripping a vertical wooden post of a fence. The fence is made of light-colored wood and runs horizontally across the middle of the frame. The background is a dense, out-of-focus green forest, suggesting a rural or outdoor setting. The lighting is bright and natural, highlighting the texture of the wood and the vibrant green of the foliage.

Maximum performance with minimum strain.

Before launching this brand new range, we wanted to find out what people were really looking for in their striking tools. As a result, we conducted extensive end-user research, including field studies and in-depth interviews, with both professional and semi-professional tool users. The research showed that users wanted tools that are hard-performing but at the same time easy on the body. Each of the tools has been developed to take into account the three things users want most – less strain, greater durability and ultimate striking control and feel.

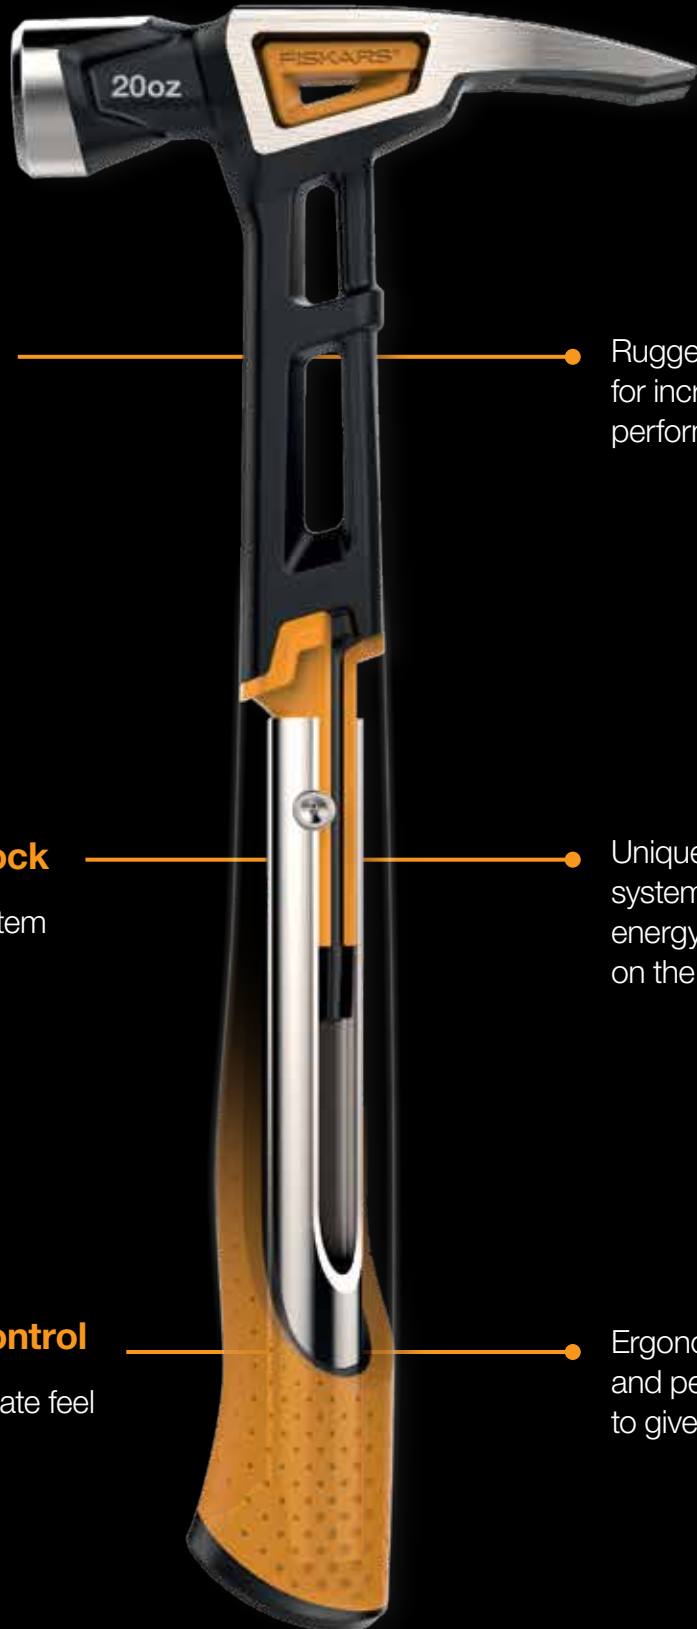

Engineered for minimum impact

In our study, vibration emerged as users' number one concern – no wonder, as we discovered jolting and shock waves can potentially lead to discomfort or even injury. This is why we asked our R&D experts to come up with a new type of anti-vibration striking tool. As a result, they created innovative

tools that minimize both shock and vibration, reducing the total energy and lowering the impact felt by the user by up to 70%. Our industry leading vibration-reduction system captures the kinetic energy of the strike, so no matter how hard the hit, the impact on the user is massively reduced.

Maintenance

A man with light brown hair, wearing a dark jacket, is looking upwards while using a pair of black pruning shears to cut a branch of a tree. The shears have orange handles and the brand name 'FISKARS' is visible on the left handle. The background is a lush green tree with many leaves, and the scene is brightly lit, suggesting a sunny day.
