Founder

- 2009 ● The company obtains the french ISO 14001 quality certification
- 2007 ● Creation of a Tannery in Vietnam
- 2004 ● Development of the export sales in Europe
- 2002 ● Creation of the Military/Administrations department
- 1995 ● Creation of a subsidiary in Vietnam, wholly owned by ROSTAING
- 1984 ● Creation of a manufacturing plant in Morocco 100% ROSTAING
- 1976 ● Creation of the Gardening/DIY department by Catherine BRAZIER-ROSTAING
- 1959 ● Creation of a manufacturing plant for protective gloves by Jean ROSTAING
- 1789 ● Creation of a Tannery in VILLIEU (01800) by Joseph ROSTAING

850 persons

- 1 Research & Development centre in Villieu, France
- 1 production plant in Villieu, France
- 1 Tannery wholly owned by ROSTAING, in Vietnam
- 3 production plants wholly owned by ROSTAING, in Vietnam
- 2 production plants, wholly owned by ROSTAING, in Morocco

ROSTAING produces more than 7 million pairs of gloves a year.

Presence in France:

- Most of the major specialists, GSB and LISA
- Government agencies, Armies and Firefighters
- Automotive industry (Peugeot, Renault, Ford etc.)
- Industry

Presence in more than 30 countries

Technological Expertise:

- Cut and sewn
- Sewnless knitting
- Cut and sewn / Coating by dipping
- Sewnless knitted, Coating by dipping
- Sewnless knitted, Cut / Sewn
- Sewnless knitted, screenprinting

Sustainable Development A green conception initiative

The company turned towards **sustainable development** in 2004.

Total control over our production processes enables us to take action at every level:

- Economic and social choices
- Eco-design policy
- Product strategy
(Gloves made of vegetable tanned, chemical-free leather)

Rostaing Tannery Production of Leather Gloves

- Respect for the Environment
- Water purification plant
- Solar energy
- Rain water recuperation system

Leather

- **Full grain:** strong and supple.
- **Cowhide:** very strong and resistant to abrasion and tearing. Leather is naturally breathable; it offers excellent comfort and dexterity. Some of our leathers are treated to resist water: "water repellent leather" and they have the advantage of staying supple and comfortable after drying.
- **Heat resistant:** The leather retains its shape up to 250°.

The fibres

ACRYLIC
Acrylic: Synthetic material that is resistant to abrasion and tearing.

COTTON
Natural fibre, supple and soft. Has good insulating power and is naturally fire-retardant.

DYNEEMA®
A high-density polyethylene fibre offering exceptional resistance to abrasion, breaking and shearing. It provides a sense of freshness and comfort, and it is very lightweight.

KEVLAR
Para-aramide is resistant to cutting and offers excellent thermal resistance.

POLYAMIDE
Synthetic material resistant to abrasion, tearing and heat up to 150°C.

POLYESTER
Synthetic material that is resistant to abrasion and tearing.

PORELLE®
Polyurethane imper-breathing membrane resistant to water and to certain chemicals; breathable.

The coatings

CHLOROPRENE
Synthetic material used in a thick coating for vibration absorbency.

LATEX
Natural waterproof material, supple and resistant to abrasion and tearing.

LATEX FOAM
Latex coating foamed by air incorporation.

NITRILE
Synthetic material resistant to chemicals and grease; supple and resistant to abrasion.

NITFOAM
Nitrile coating foamed by air incorporation. This process makes nitrile supple and very breathable.

NITRITEC™
Nitrile is made with microscopic asperities that improve and reinforce the product's grip, in an exceptional way.

POLYURETHANE
Supple synthetic material, resistant to abrasion and breathable.

ECOVINYL
Polyvinyl chloride.

ROSTAING GUARANTEES QUALITY AND COMPLIANCE WITH EUROPEAN STANDARDS

3 main PPE categories, according to the hazards:

TYPE II and TYPE III gloves

EMPLOYER LEGAL OBLIGATIONS

Under OH&S legislation the employer is obliged to:

- **Assess the workplace** to determine if hazards are present that require the use of PPE.
- **Select PPE** and supply them free of charge and individually.
- **Require** his employees to use it, communicate his PPE selection decisions to his employees and select PPE that properly fits his workers.
- **Train employees** who are required to wear PPE on how to do the following: use PPE properly, be aware of when PPE is necessary, know what kind of PPE is necessary.
- **Bring employees** to understand the limitations of PPE in protecting employees from injury, do-on, adjust, wear and do-off PPE and maintain PPE properly.

THE NOTIFIED BODIES:
(Having performed tests on Rostaing gloves)

- C.T.C. No. 0075
Centre Technique du Cuir (Technical Leather Centre)
MECHANICAL HAZARDS
- I.F.T.H. No. 0072
Institut Français Textile et Habillement (French Textile and Clothing Institute)
THERMAL HAZARDS
COLD HAZARDS
MECHANICAL HAZARDS

INSTRUCTIONS FOR USE:

The user must be informed of the conditions for use as well as the type of hazards against which they protect before each use of protective gloves. This will enable the user to check that the PPE corresponds to the required protection in the tasks to be performed. A User Instruction for Use is supplied with the smallest packing or the

The letter "i" in the pictogram featured in the marking on the glove indicates the obligation to read the manufacturer's instructions.

TYPE I - MINOR HAZARDS

MANUFACTURING

- Self-certification by the manufacturer.
- Manufacturer's declaration of conformity.
- Design and marketing under the sole responsibility of the manufacturer.

MARKING

- CE marking
- Name of the manufacturer.
- Reference of the glove.
- Size indication.

USER INSTRUCTION FOR USE

- Conditions of use with the phrase: "For minor hazards only".
- Available sizes.

TYPE II - SERIOUS HAZARDS

MANUFACTURING

- CE Type Test Certificate issued by a Notified Laboratory.
- Manufacturer's declaration of conformity with number of EC Type Test Certificate.
- Manufacturing monitoring by the manufacturer.

MARKING

- CE marking
- Name of the manufacturer.
- Reference of the glove.
- Size indication.

USER INSTRUCTION FOR USE

- Conditions of use.
- Available sizes.
- Storage instructions.
- Cleaning instructions.
- Performance levels and their meanings.
- Pictograms.
- Contact details of the laboratory that issued the certification.

TYPE III - FATAL HAZARDS

(Irreversible lesions)

MANUFACTURING

- CE Type Test Certificate issued by a Notified Laboratory.
- Manufacturer's declaration of conformity with number of EC Type Test Certificate.
- Manufacturing monitoring by another notified body according to:
 - PROCEDURE 11A: Periodical tests
 - PROCEDURE 11B: AUDIT if the manufacturer has a QUALITY CONTROL system.

MARKING

- CE marking + No. of the notified body that monitors manufacturing (i.e. AFAQ No. 0333).
- Name of the manufacturer.
- Reference of the glove.
- Size indication.

USER INSTRUCTION FOR USE

- Conditions of use.
- Available sizes.
- Storage instructions.
- Cleaning instructions.
- Performance levels and their meanings.
- Pictograms.
- Contact details of the laboratory that issued the certification.
